

Spinning Disc Applicator

wilevco

Precisely, gently
and uniformly
apply coatings
of almost any
viscosity – even
with particulates.

Spinning Disc Applicator

The Wilevco patented Spinning Disc Applicator precisely and uniformly applies coatings of almost any viscosity with no messy airknives, dips or waterfalls.

Sample Applications

- Sauces
- Glazes
- Syrups
- Barrier Coatings
- Spice Mixes
- Fats / Oils
- Herb Butters
- Slurries
- Chocolate / Caramel
- Antimicrobials

No Nozzles

Coatings move gently onto the center of the disc without clogging or dripping regardless of viscosity.

Great with Particulate

The nozzle-less design allows the spinning disc applicator to consistently and accurately deposit coatings – even with particulates.

Full Recovery

The completely enclosed design recovers unused coating, saving producers up to 60% versus conventional systems.

Customizable Pickups

Available in top only, top and bottom, and high and low pickup rates depending on your individual needs.

Precise and Infinitely Adjustable

Infinitely variable belt speed and pump pressure allow customized pickup rates based on your needs.

Versatile

Easily switch between products with no equipment changeovers.

Automated

The combination of Allen-Bradley controls and the patented delivery system provide precise, efficient coating without manual adjustments.
